

Designing a Community Approach to Mental Health

Town Hall: May 10, 2019 - 7:30am - 4:30pm *Yuma County Main Library*

When mental health needs go unresolved, everyone in our community feels the impact.

This is a very human crisis that fills our jails and hospital emergency room, many times directly impacting the workplace, our family and our circle of friends. Area leaders, from throughout our community, are encouraged to come together as we actively explore collaborative opportunities to resolve this growingly complex issue. Through the consensus-building process, we will explore how to best to target our limited resources towards finding real long-term sustainable solutions.

Mental health in our community impacts everyone.

Consider these challenges experienced every day in Yuma...

- The young adult dealing with depression and the added pressures of social media
- An employee struggling at work following a painful divorce
- The repeat offender revolving through our jail system because they lack resources to address their bipolar disorder
- An elderly grandmother suffering from severe dementia whose family can no longer properly care for her at home

Your participation is needed - Reserve a seat today at:
